

Advanced DAX Training - Starting Data Model

This PBIX File serves as the Source Datasets for PowerPivotPro's Advanced DAX Training

You do NOT have access to the Source Data & Do NOT need to Refresh; Only need to use the Data Model

Advanced DAX focuses on the tricky topics such as:

- > Row & Filter Context, X Functions, Disconnected Slicers, Table Functions,
- > Time Intelligence, Performance Tuning, Fair Metrics, Relationship Problems and etc.

Advanced DAX Training - Tables

Fields

Search
