

# **Building a Southern European Insurance Champion**

January 2026

## Three ideas to take away from this presentation...

The biggest opportunity in AI isn't licensing fees; it's transforming traditional low-margin industries such as insurance. By owning more of the value chain, we capture more value and build a more defensible moat than SW.

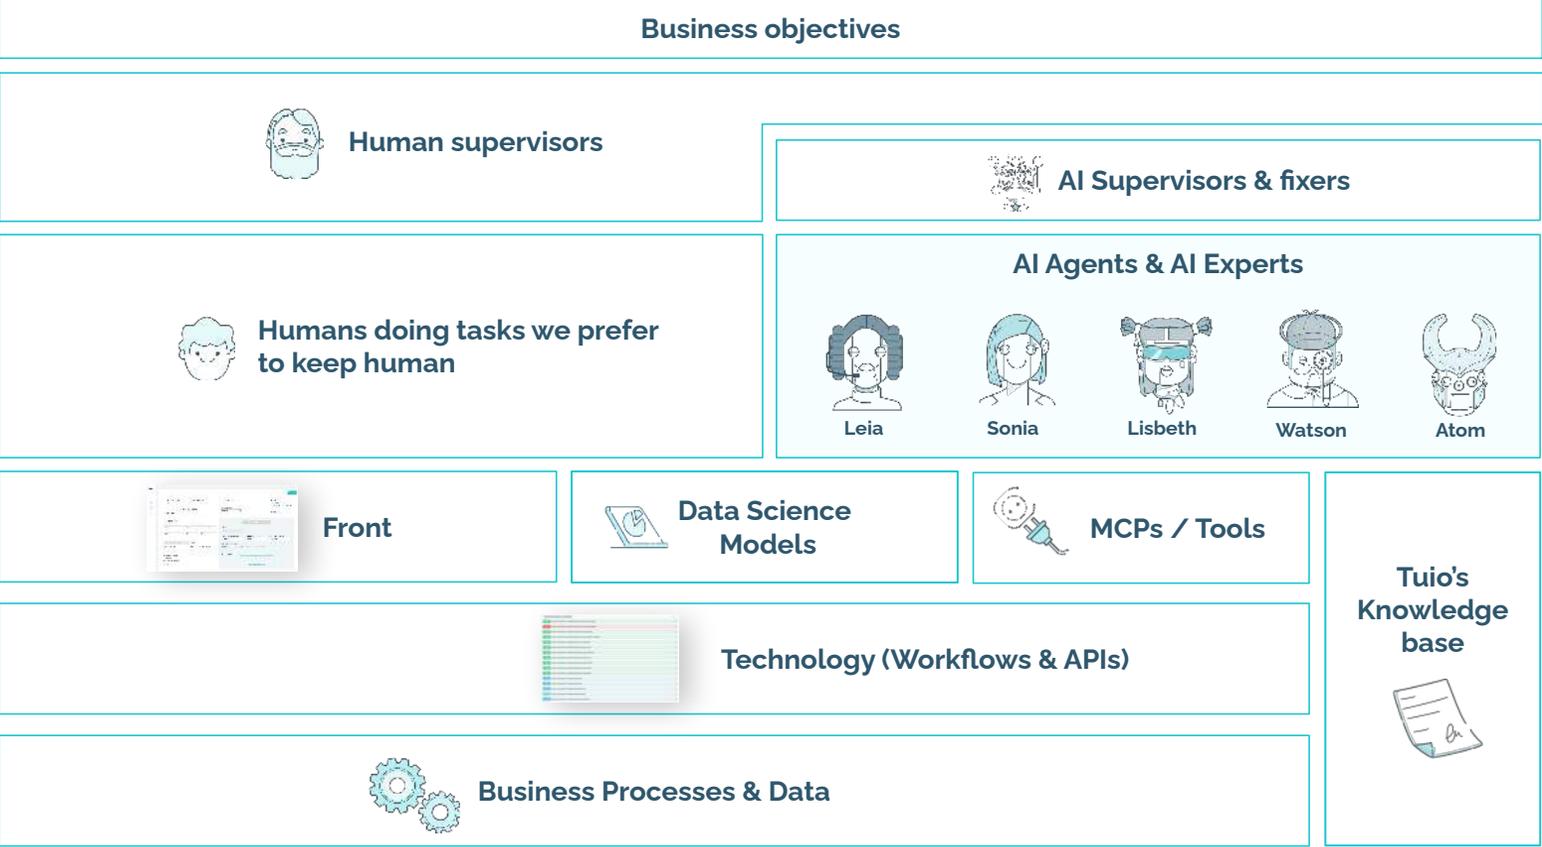

Customers aged 21-50yr, which will spend +200B€ in insurance in the next decade in Southern Europe, are a conundrum for traditional insurers and are the perfect playground to develop a full stack AI native model.

We have already built a competitive advantage based on technology, data and AI that allows us to operate home insurance with 3.4x margin vs. traditional competitors while being aggressive in price.

# We focus on customers 21-50yrs open to self-service digital insurance

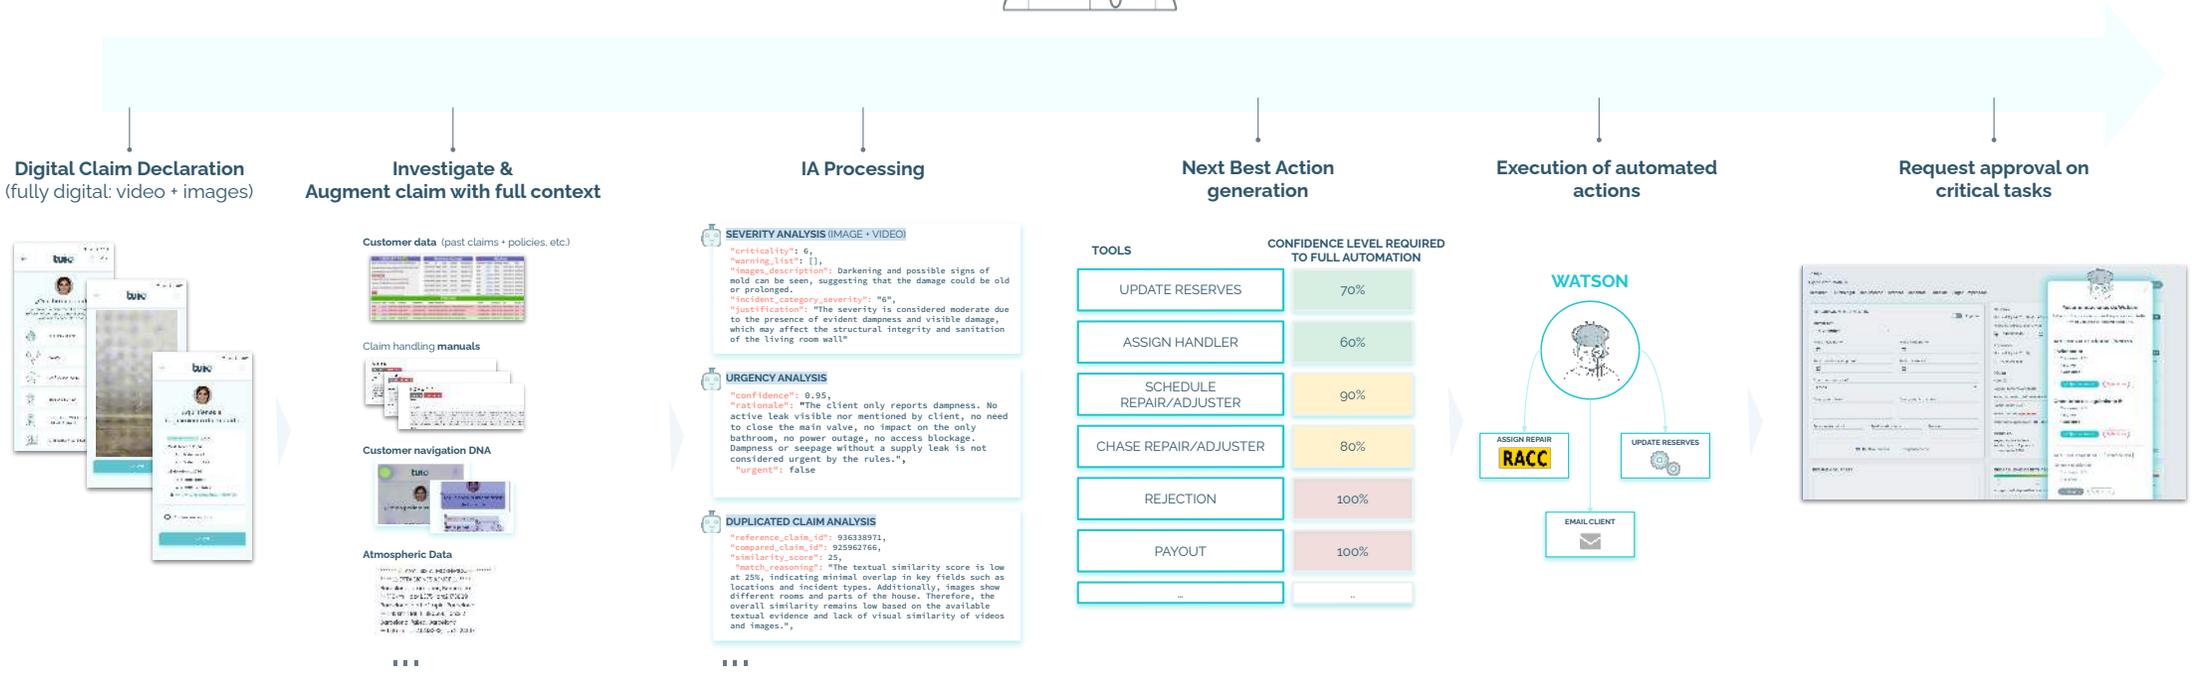

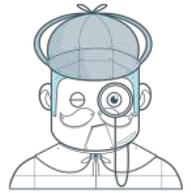

# Stack designed from the ground up to create a tech-based cost advantage

## OUR GOALS

- 1 Touchless cost-to-serve
- 2 In-depth customer knowledge
- 3 Superb claims management
- 4 Very efficient distribution

# Watson. How does it analyze a claim?

# Atom. From time-consuming analysis to fast daily insights on Paid campaign performance

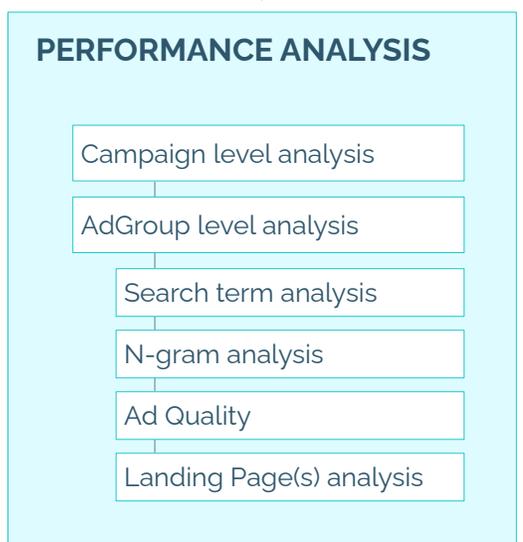

## QUERY DATA

MCP server enables querying ads data in natural language

## PERFORM ANALYSIS

**Prompt:** Limit analysis to specific campaign/adgroup o certain analysis

## GENERATE INSIGHTS

*Bidding recommendation*

**Main Performance Driver: Rent\_General**

Metric	Week 1	Week 2	Week 3	Change
Avg CPC	€2.15	€2.84	€2.61	✗ +21.4%
CTR	8.2%	9.1%	7.6%	✗ -4.9%
ROAS	1.85x	2.12x	1.94x	✓ +4.9%

**Action Plan:** ● MEDIUM CONFIDENCE

- Decision:** Add budget cautiously (+ 5-10%)
- Rationale:** Some budget headroom with moderate rank loss

*Search term waste optimization*

Search Term	Total Cost	ROAS	Issue
seguros hogar españa	€20.62	0%	Generic geo term, no conversions
seguro hogar todo riesgo	€9.59	0%	General home insurance, no conversions

*Copywriting suggestions*

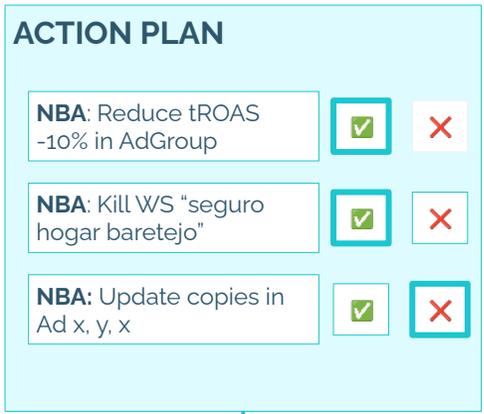

**DESCRIPTION UPGRADES**

**REPLACE:**

- ✗ "La letra pequeña es del siglo pasado..."
- ✓ "Cancelaste Netflix fácil. Tu seguro igual: App → Cancelar → Listo"
- ✗ "Mejor precio del sector. Compruébalo..."
- ✓ "María (Madrid): De 73€ a 31€/mes. Mismas coberturas"

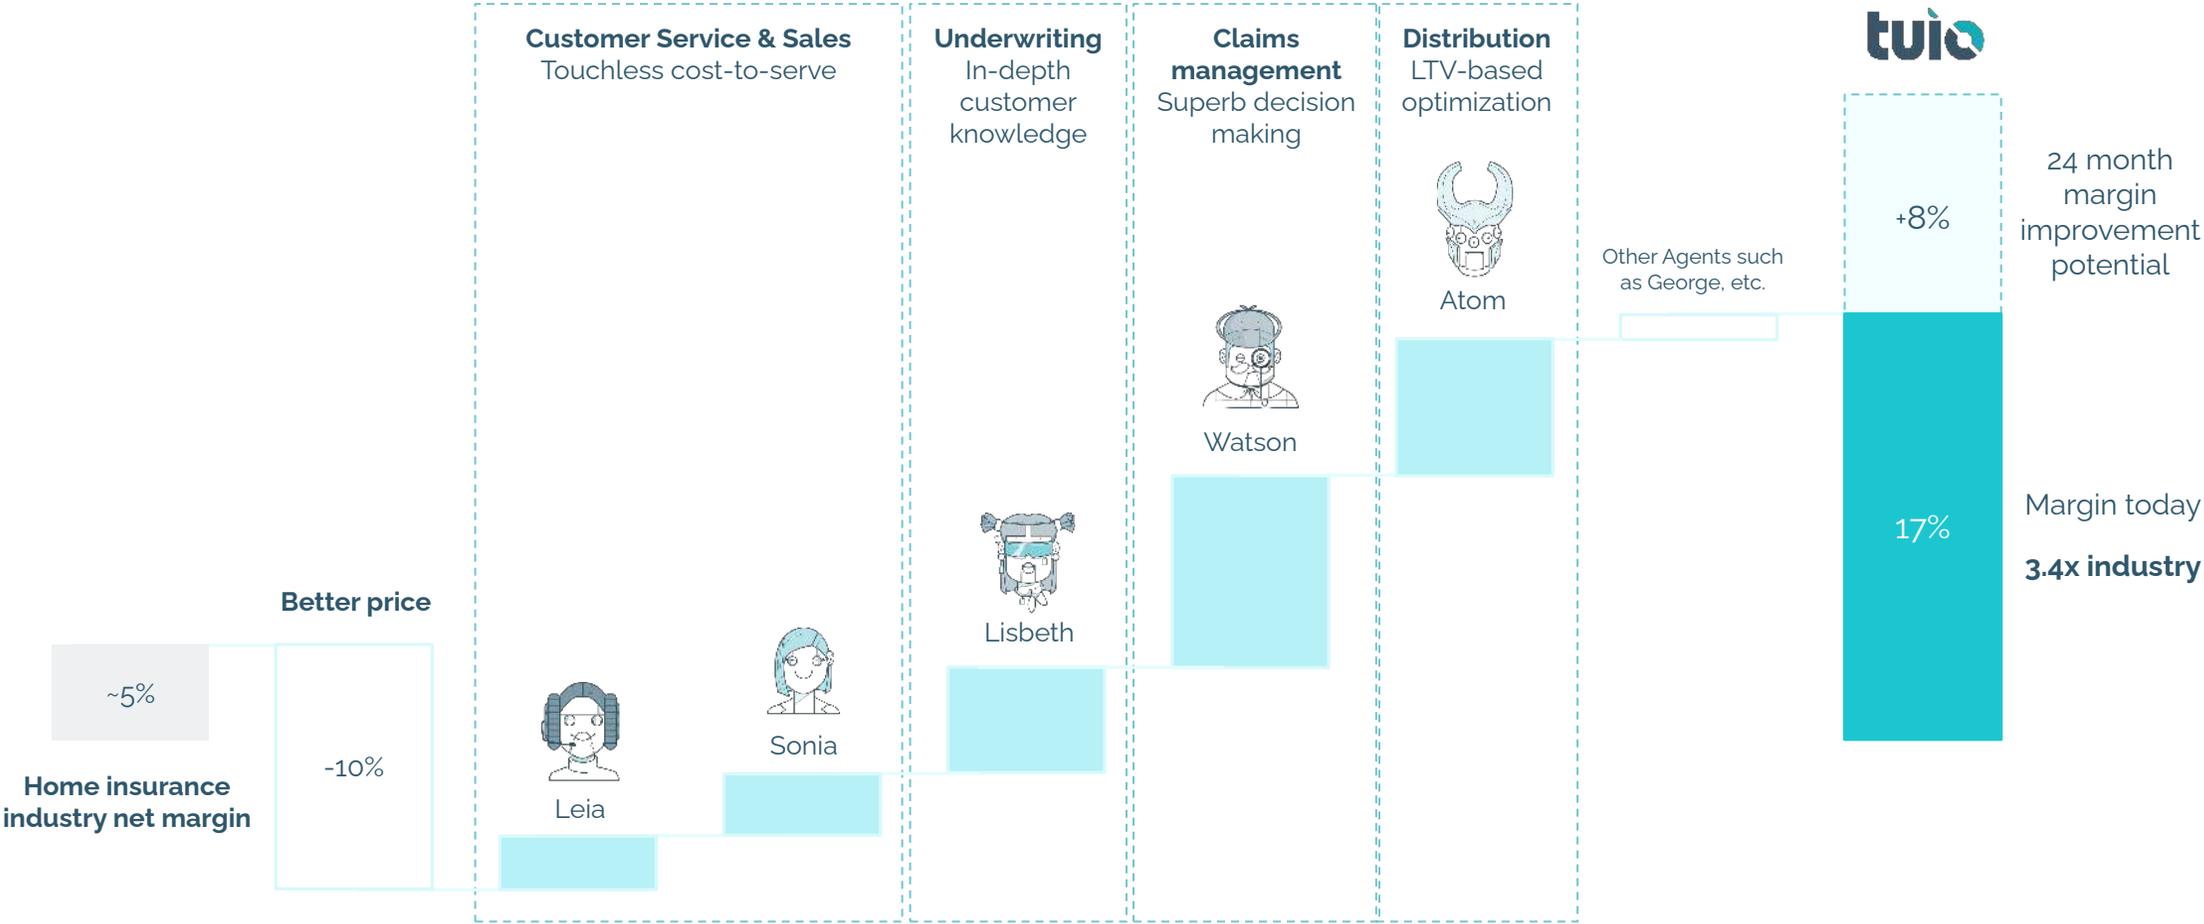

## TAKE ACTION

MCP server enables querying ads data in natural language

*Automated ad updates based on suggested actions (high confidence actions performed with no human intervention)*

# Our AI model operates with 3.4x margin vs competitors in home insurance with a -15% Premium

Source: Premium and claims market data from 2024 DGSFP public data, 2024 ICEA report & expert interviews. Cost of customer service and call center derived from expert interviews. Tuio data and analysis as of 31st September 2025. CAC estimated from 2023 annual report from Linea Directa assuming an average lifetime of 6yr for both portfolios.
